

Tiger Beach Grand Bahama Island Live-Aboard Shark Diving Adventure September 26 to October 2, 2020

Tiger Beach is one of the most amazing places on earth. It presents the unique opportunity to dive with very large Tiger Sharks as well as Lemon sharks, Caribbean Reef Sharks, Great Hammerheads, Atlantic Spotted Dolphins, and Goliath Groupers. Some highlights:

- The Shearwater leaves from West Palm Beach; no international flight is required.
- The dive sites in and around Tiger Beach often boast visibility up to around 400 feet.
- Interactions with five shark species and endless photo opportunities.
- Accommodations for 5 days of diving and 6 nights. All meals are included.

Upon arriving in West Palm Beach the Shearwater will leave for Tiger Beach located near West End on the north-west corner of Grand Bahama Island. We will cross the Gulf Stream as you sleep on the first evening aboard the Shearwater. After waking and clearing customs, it's a very short ride from West End to Tiger Beach

The visibility and the very shallow depths make for 70-minute bottom times with these majestic creatures. This is a life experience that should be experienced by all marine animal lovers. On this trip you will learn so much about sharks, their behavior and you will experience the most amazing interactions.
