

Megalodon Teeth Diving Adventure And Wreck Dives Wilmington NC

Sept 13th,2024 to Sept 15th,2024

Join the Brass Anchor for a great Adventure to look for Megalodon teeth in Wilmington NC. We will be joining Aqua Safaris for our Meg tooth adventure. We will do 4 dives looking for Meg teeth Friday and Saturday, then we will be diving the Hyde and Gill on the Sunday for a couple of Wreck dives expecting to see lots of Sand Tiger Sharks and Sand bars. The pictures on this page of our groups over the past year or so finding 3-million-year-old fossils. It's amazing that we can find these teeth and take them home with us. Teeth diving is a lot of fun

You will need a reel so that you can tie into the Mooring line. And you run this reel as you look for teeth. Most likely silting the bottom out. The line is your way back to the mooring for ascent. You will also need an SMB. If you can't find your way back or, there is a current that takes you away from the site. You will need to have an SMB with you. You will also need a small mesh bag to put your teeth in when you find them. These are all mandatory pieces of gear for this trip. 😊

As for the last day of wreck diving For the past several years, there have been resident FULLY grown Sand Tiger and Sandbar Sharks on the Hyde & Gill. These sharks are non-aggressive but thrilling to dive with!! Don't miss out this summer.
